---

Tony,

As we discussed, here are maps showing the damaged area of the San Jacinto Waste Pits cap as well as the location & results of the shallow (0 - 6") sediment sampling done in December 2015. These samples were collected within the damaged area & from accumulated sediment on top of the underwater portion of the cap.

The damaged area was repaired in December, and I'm also attaching a figure with survey results showing the location of the new armor rock cap material over the damaged area.

Finally, I am attaching several figures showing the sediment sample results located in and around the site; these sample were collected about 5 years ago as a part of the site Remedial Investigation. One of these figures shows the surface sediment (0 - 6") and the other shows the sediment core (10 feet) results.

Please let me know if you have any questions on this.

Regards,

Gary Miller  
Remedial Project Manager  
EPA Region 6 – Superfund Division (6SF-RA)

Gary:

I spoke with Paul (ERDC) earlier and he informed me that EPA may ask ERDC for additional technical support. I was hoping to get a copy of the sample location map and analytical results to determine impacts or risks to the Corps proposed dredging operations. I'd appreciate any info you can share in this regard.

Thanks  
TONY

Tony,

Yes, I am the San Jacinto RPM - please let me know how I can help.

Thanks Tony,

Yes, Gary is the RPM for the San Jacinto Site. I included him on this email..CAS

Carlos A. Sanchez  
Chief, Superfund AR/TX Section

Carlos:

I just received a copy of the press release for the San Jacinto SF discharge.

Blockedhttp://yosemite.epa.gov/opa/admpress.nsf/e8f4ff7f7970934e8525735900400c2e/83ddf70854df3fae85257f5c0077e6c5!OpenDocument

Some of the Corps and EPA staff were meeting to discuss dredging the Houston Ship Channel and sampling requirements. Is Gary Miller still the RPM? I'd like to get a little more details and information?

Thanks

TONY
